SELECTED SERVICES Laundries, Cleaning Plants, and Related Services

U.S.
DEPARTMENT
OF COMMERCE

Bureau of
the Census

The 1967 Census of Business reports will comprise eight volumes:

Vols. I, II, III, IV—Retail Trade
Vols. V, VI—Wholesale Trade
Vols. VII, VIII—Selected Services

Selected Services reports are issued first as separate preprints and then brought together in the following volumes:

VOL. VII. SELECTED SERVICES, SUBJECT REPORTS

A U.S. Summary chapter and chapters providing special data on many service industries, including laundry and dry cleaning plants, hotels and motels, motion pictures, travel agencies, law firms, and architectural and engineering firms. This volume consists of the subject reports previously issued as series BC67-SS.

VOL. VIII. SELECTED SERVICES, AREA STATISTICS

A U.S. summary chapter and chapters for each State, the District of Columbia, Guam, and the Virgin Islands. Statistics are presented by kind of business, for counties, cities, standard metropolitan statistical areas, and for selected towns and townships in New England, New Jersey, and Pennsylvania. The kind-of-business detail varies in accordance with the number of service establishments in an area. This volume consists of the area reports previously issued as series BC67-SA.

This report is a preprint of a corresponding chapter of Vol. VII—Selected Services, Subject Reports.

Introduction

AUTHORITY AND SCOPE—The economic censuses are required by law under Title 13 U.S. Code, sections 131, 191, and 224. The 1967 Census of Business portion of the economic censuses consists of firms engaged in retail trade, wholesale trade, and selected services (hotels and motels; personal, business, and repair services; and amusement and recreation services including the motion picture industry) which operated in the United States. In addition, the Census of Business covered public warehouses, dental laboratories, law firms, architectural and engineering firms, travel agencies, and truck and bus carriers not subject to economic regulation by the Interstate Commerce Commission. Data for the contract construction industry also were collected in this census but published in a separate series of reports. The 1967 Census of Business also covered Guam and the Virgin Islands. A separate 1967 Census of Business, Manufacturers, and Construction for Puerto Rico was conducted jointly with the Commonwealth Government.

KIND OF SERVICES COVERED—This report presents data for power laundries; cleaning and dyeing plants; industrial laundries; linen supply; diaper service and garment pressing, alteration, and repair shops business. These comprise groups 721 and 727 as defined in the Standard Industrial Classification (SIC) Manual.¹

¹ Executive Office of the President, Bureau of the Budget, **Standard Industrial Classification Manual, 1967.**

The data in this report supplement those in the area report series BC67-SA. For definitions, see appendix A.

Most of the tabulations included in the report are based on special inquiries directed to establishments with payrolls ("employers") primarily engaged in laundering, cleaning and dyeing, and related services. Similar information is not available for establishments without payrolls ("nonemployers") because the data for non-employer establishments were derived from the administrative records of the Internal Revenue Service (IRS) and the Social Security Administration (SSA) which did not contain the special inquiries included on census forms. (See "Method of Coverage" in appendix A.) Establishments with payrolls represented 59 percent of the number in this group and accounted for 92 percent of their volume of receipts.

CENSUS DISCLOSURE RULES—In accordance with Federal law governing census reports, any data which would disclose the operations of an individual establishment or business organization are not published. However, the number of establishments in a kind of business is not considered a disclosure, so that this item may appear in instances where other items of information for the same kind of business or locality are withheld.

CORRECTIONS TO DATA—Some of the data in this report comprise the statistical portions of previously published reports. Errors found after those reports were issued have not been carried to this report unless they significantly affect the data. As a result, the detail in some tables may not add to totals.

GENERAL EXPLANATION

CENSUS COVERAGE

Method of Coverage—Effective with the 1967 Census of Business, a major shift in the method of compiling data was introduced. In the 1954, 1958, and 1963 censuses data for all “employer” establishments (those which had some paid employment during the census year) were obtained through a mail canvass. Information for “nonemployers” was obtained from Federal income tax records.

In the 1967 Census of Business, service firms were divided into two categories—the “mail” universe and the “nonmail” universe. The coverage of each component and the method of obtaining census information for these two groups are described below.

1. **The “nonmail” universe**—This group consists of firms which were not required to file a regular census return and includes the following categories:

a. **All “nonemployers”**—Consists of all firms with no paid employment during 1967. Receipts information for these firms was obtained from 1967 Federal income tax records. Although made up of a large number of firms, this segment, for kinds of business covered in this report, accounted for only 8 percent of total receipts. (Also see “Comparison of the 1963 Census With the 1967 Census,” item 3, on next page.)

In the 1967 census, data for all nonemployer establishments were compiled from tax records. In the 1963 census, data were compiled from only one-half of the nonemployer tax returns and were multiplied by 2 to establish census totals.

The census included only those service nonemployer firms which reported a receipts volume of \$1,000 or more during 1967 or, having been in operation for less than the full year, reported receipts which would have reached a total of \$1,000 or more on an annual basis. This treatment is the same as in the 1963 census.

b. **Selected “small employers”**—“Employers” consist of all business firms in the active records of the Internal Revenue Service (IRS) which were subject to payment of Federal Insurance Contribution Act (FICA) taxes. “Small employers” consist basically of all those single unit firms with payroll be-

low a specified cutoff. The cutoff varied by kind of business (see “The mail universe,” item 2 below, for treatment of businesses covered in this report) and was designed, in most cases, to limit the “nonmail” group to establishments which would account for not more than 20 percent of total receipts in each kind of business. The “number-of-employee” equivalent of the payroll cutoff generally was in the range of one to three employees.

Data on receipts, payroll, and employment for “under cutoff” employer firms were obtained from the administrative records of the Internal Revenue Service (IRS) and the Social Security Administration (SSA).

2. **The “mail” universe**—Information for firms in this group was obtained basically by means of a mail canvass. However, information on first quarter payroll and mid-March employment for single-unit employers (section b. below) was obtained from IRS and SSA records. All employer firms for the kinds of business covered in this report, except garment pressing, alteration, and repair, SIC group 727 were included in the mail universe on a 100 percent basis (without a payroll cutoff as described in item 1-b above). It is from firms in this group that specialized data, in addition to receipts, annual payroll, and employment, were collected. Appendix B presents a facsimile of the report form used in the mail canvass. The mail universe includes the following categories:

a. **Firms in the census prec canvass**—The census prec canvass operation was basically designed to identify firms which operated units at more than one location.

Firms which were included in the prec canvass were drawn primarily from 1963 census records of multiunit firms and larger employers.

b. **Firms not in the census prec canvass**—Other firms included in the mail universe consist of other employers than those covered by section 1-b or 2-a above.

Comparison of the 1963 Census With the 1967 Census—Except for the method of coverage described above, the 1963 and 1967 censuses were conducted under similar conditions and procedures. Strict comparability of the data for the two censuses is limited by the following factors:

1. **Classification**—For both 1963 and 1967, nonemployer firms were classified on the basis of information supplied on the Federal income tax returns. However, the 1967 classifications for nonemployer firms were coded in less detail than in 1963. Therefore, 1967 data for the combination of “employer” and “nonemployer” establishments are presented in less kind-of-business detail than was the case in 1963. Data for employer establishments, however, are shown in full detail.

For 1963, nonemployer firms were classified by IRS personnel with technical assistance of Census Bureau personnel. For 1967, classification of these firms was performed by personnel of the IRS through use of a coded listing of the kinds of business which were to be separately identified. While the technique of classification was substantially the same and was based on the firm’s description of its principal business activity, greater use was made in 1967 of “basket” classifications (e.g., miscellaneous business services).

The 1967 census classification for the small employer firms (see coverage of employers above) which were not mailed the census report form was based on the following:

a. If the firm had been in business in 1963, the kind-of-business classification which had been assigned in that census was used.

b. If the firm was a “birth” since 1963, the SSA classification was used if it corresponded to a census classification.

c. If an adequate kind-of-business classification could not be assigned under the procedures outlined in a. and b. above, the firm was mailed a brief inquiry requesting information needed to assign such a classification.

d. If these three procedures proved inadequate, the firm’s description of its principal business activity as entered on its IRS business tax return was used.

To determine the census classification for both 1963 and 1967 for establishments in the mail universe (section 2 under “Census Coverage” above), considerable use was made of “self-designation.” For kinds of business which posed classification problems, however, including the kinds of business covered in this report, special questions were included to assist in assignment of the census classification.

In both 1963 and 1967, the primary criterion for classification (for establishments reporting this information) was the source of the firm’s receipts. However, the rules used for differentiating “Power laundries, family and commer-

cial” (SIC 7211) from “Self-service laundries” (now part of SIC 7215 and titled “Coin-operated laundries”), were different in these two censuses, as follows: The 1963 rule combined receipts from both power and self-service laundry work to determine that an establishment was primarily engaged in laundry work. After this was determined, an establishment was classified as a power laundry if it had more than one machine exceeding 16 pounds capacity, regardless of equipment size, and receipts were primarily from laundry work not done by customers. The first rule resulted in classifying as power laundries many establishments whose primary source of receipts was from self-service because they operated two or more “large” capacity washing machines.

In the 1967 census the classification of many establishments changed because the presence of large capacity washing machines was not used as a criterion. All establishments whose primary source of receipts was from self-service work were classified as coin-operated laundries. This classification difference, undoubtedly, accounts for most of the decline in the number of power laundries between 1963 and 1967.

2. **Active proprietors**—In the 1963 census, the number of active proprietors of unincorporated businesses was computed by crediting sole proprietorships with one proprietor and partnerships with two proprietors for each establishment in business during the week of November 15. In this report, the count of active proprietors is based on crediting each sole proprietorship with one active proprietor and each partnership with two active proprietors for the following types of firms, including multiunits firms:

a. All firms in business the full year.

b. All payroll firms in business during the pay period including March 12, 1967.

c. Every second nonpayroll firm not in business the full year.

3. **Coverage of nonemployers**—Although a comparison of data for nonemployer firms from the 1963 and 1967 censuses seems to indicate that there was an increase in the number of such firms and that they accounted for approximately as large a proportion of total service receipts volume in 1967 as in 1963, these conclusions are subject to the following limitations:

The combination of (1) the census processing cutoff occurring before the completion of the flow of tax forms from which the census nonemployer data were derived and (2) other processing omissions is estimated to have led to a loss of about 50,000 nonemployer firms

accounting for about 1 percent of service receipts volume in 1963. This estimate, which is based on a study of a sample of tax forms made after the 1963 census results were compiled, reflects a more substantial census omission than previously had been estimated. Because of a later processing date for the 1967 census, omissions from this census are believed negligible. Both censuses probably omitted a small number of nonemployers (accounting for a negligible receipts volume) because the tax form kind-of-business description was inadequate to indicate they conducted an in-scope kind of business.

As noted in section 1-a under "Method of Coverage" above, only those service non-employer establishments were included in the census which reported a receipts volume of \$1,000 or more during 1967 or, having been in operation for less than the full year, reported receipts which would have reached a total of \$1,000 or more on an annual basis. While these are the same rules used in the 1963 Census, a modification to reflect price changes probably would have resulted in the exclusion of several thousand additional marginal firms.

4. Payroll—In 1963 the inclusion in payroll of gratuities received by employees from patrons was not requested. In 1967, both in the case of payroll reported to the Internal Revenue Service and payrolls reported to the Census Bureau, businesses were requested to include in payroll the amount of tips and gratuities which were reported to employers as received by employees from patrons.

EXPLANATION OF TERMS

Establishments—An establishment is a single physical location at which business is conducted. An establishment is not necessarily identical with the "company" or "enterprise" which may consist of one or more establishments. Census of business figures represent a summary of reports for individual establishments rather than companies. For businesses which were mailed a census form, separate information was obtained for each location where business was conducted, including each location of multiunit organizations. Each report was tabulated in accordance with the physical location at which the business was conducted.

Where two or more activities were carried on at a single location under a single ownership, all activities generally were grouped together as a single establishment, and the entire establishment was classified on the basis of its major activity, with all data for it included in that classification. However, in

cases where distinct and separate economic activities (for which different industry classification codes were appropriate) were conducted under the same ownership at a single location, and where conditions prescribed by the Standard Industrial Classification (SIC) Manual¹ for recognizing the existence of more than one establishment were met, separate establishment reports for each of the different activities were reported in the census.

Collecting and distributing units (branch outlets and pick-up stations) owned and operated by power laundries and dry cleaning plants are not treated as separate establishments. (See "Kind-of-Business Classifications" below.)

Leased service departments (separately owned businesses operated as departments of another service establishment or of a retail establishment, such as, a separately owned shoeshine parlor in a barber shop or a beauty salon in a department store) are treated as separate service establishments in the selected services portion of the 1967 census.

Receipts—Receipts include the total of all receipts from customers for services rendered and merchandise sold during 1967 whether or not payment was received during 1967. Total receipts exclude amounts other than those received from customers, such as income from investments, rental of real estate, etc. They include local and State sales taxes and Federal excise taxes collected by the establishment directly from customers and paid directly by the establishment to a local, State, or Federal tax agency. Gasoline, liquor, tobacco, and other excise taxes paid by the manufacturer or wholesaler and passed along to the service establishment are also included.

Receipts do not include service receipts of manufacturers, wholesalers, retail establishments, and other businesses whose primary activity is other than service. They do, however, include receipts other than from services rendered (e.g., sales of merchandise to individuals or to other businesses) by establishments primarily engaged in performing services.

Although the count of establishments in this report represents the number in business at the end of the year, the receipts figures include receipts of all establishments in business at any time during the year. Nonemployer establishments are included in the tables if they operated at an annual receipts volume rate of \$1,000 or more; however, their reported re-

¹ Executive Office of the President, Bureau of the Budget, Standard Industrial Classification Manual, 1967.

ceipts have not been projected to a full year's operation.

Payroll entire year—Payroll includes all forms of compensation such as salaries, wages, commissions, bonuses, vacation allowances, sick leave pay, and the value of payments in kind (such as free meals and lodgings) paid during the year to all employees. Tips and gratuities received by employees from patrons which are reported to employers are included. For corporations, it includes amounts paid to officers and executives; for unincorporated businesses, it does not include compensation of proprietors or of partners. Payroll is reported before deductions for social security, income tax, insurance dues, etc. This definition of payroll is the same as that used by the Internal Revenue Service for purposes of reporting on Form 941.

Paid employees for the pay period including March 12, 1967—Paid employees consist of the number of employees, including salaried officers and executives of corporations, who were on the payroll in the pay period including March 12, 1967. Included are employees on paid sick leave, paid holidays, and paid vacations. Proprietors and partners of unincorporated businesses are not included. The definition of paid employees is the same as used in reporting on IRS Form 941.

Active proprietors of unincorporated businesses—The number of active proprietors shown in this report is based on crediting each sole proprietorship with one active proprietor and each partnership with two active proprietors for the following types of firms:

1. All firms in business the full year.
2. All payroll firms in business during the pay period including March 12, 1967.
3. Every second nonpayroll firm not in business the full year.

For multiunit proprietorships and partnerships, proprietors were credited to only one establishment of such multiunits.

Standard metropolitan statistical area—The standard metropolitan statistical areas (SMSA's) for which data are shown are those defined by the Bureau of the Budget.² A standard metropolitan statistical area is a county or group of contiguous counties (except in New England) which contains at least one central city of 50,000 inhabitants or more, or "twin

cities" with a combined population of at least 50,000. In addition to the county or counties containing such a city or cities, contiguous counties are included in an SMSA if, according to certain criteria, they are essentially metropolitan in character and are socially and economically integrated with the central city. In New England, towns and cities rather than counties are the units used in defining an SMSA.

KIND-OF-BUSINESS CLASSIFICATIONS

"Services," as defined in the 1967 edition of the SIC Manual, includes establishments primarily engaged in rendering a wide variety of services to individuals and business establishments.

Establishments covered by the census were assigned a kind-of-business classification in accordance with the provisions of the 1967 edition of the SIC Manual. The basis for kind-of-business classification is described above in the sections under "Method of Coverage" and "Comparison of the 1963 Census With the 1967 Census—Classification."

This report includes data for SIC groups 721 and 727. Descriptions of those kinds of business for which data are provided in this report follow.

Coin-operated laundries and dry cleaning (SIC 7215)—Establishments primarily engaged in furnishing the use of laundry and dry cleaning equipment for use on their own premises for a fee. Included are establishments known as "laundromats," "launderettes," "self-service dry cleaners," etc. Establishments which install and operate coin-operated laundering machines in apartment houses are included under "Miscellaneous personal services" (SIC 7299). Establishments which rent coin-operated laundering machines, e.g., to apartment houses, are included under "Equipment rental and leasing services" (SIC 7394).

Power laundries, family and commercial (SIC 7211)—Establishments primarily engaged in operating mechanical laundries with steam or other power. Data for collecting and distributing units (branch outlets and pick-up stations) owned and operated by power laundries are merged with those for the laundry which owned them and are not treated as separate establishments. Independently owned agencies for laundry plants are included in the classification "Garment pressing, alteration, and repair" (SIC 7271). Excluded are establishments which have power laundry equipment

² Executive Office of the President, Bureau of the Budget, *Standard Metropolitan Statistical Areas, 1967*, as amended January 15, 1968.

but which are primarily engaged in a specialty such as industrial laundering, linen rental, or diaper service. These are presented in separate categories as shown below.

Industrial launderers (SIC 7218)—Establishments primarily engaged in supplying laundered or dry cleaned work uniforms, and laundered wiping towels, safety equipment (gloves, flame resistant clothing, etc.), dust control items such as treated mats or rugs, mops, dust tool covers and cloths, other items to industrial or commercial users. These items may be the property of the industrial launderers who supply them to users on a rental basis, or they may be the property of the customer. Establishments included in this industry may or may not operate their own laundry or dry cleaning facilities.

Linen supply (SIC 7213)—Establishments primarily engaged in supplying to commercial and service establishments or household users, on a rental basis, such laundered linens as uniforms, aprons, table covers, and towels. Establishments included in this classification may or may not operate their own power laundry facilities.

Diaper service (SIC 7214)—Establishments primarily engaged in supplying diapers (including disposable) and other baby linens to homes usually on a contract basis. Such establishments may or may not operate their own power laundry facilities.

Laundries, except power and coin-operated (SIC 7212)—Establishments such as "French," "Chinese," and other laundries designating themselves as hand laundries, primarily engaged in furnishing laundry finishing services. Many of these establishments use some power equipment but not of the industrial type.

Dry cleaning plants, except rug cleaning (SIC 7216)—Plants primarily engaged in dry cleaning and dyeing apparel and household fabrics. Establishments primarily engaged in cleaning and repairing rugs are included under "Rug cleaning and repairing plants" (SIC 7217), and establishments which clean rugs on location are included under "Miscellaneous personal services" (SIC 7299). Data for collecting and distributing units (branch outlets) owned and operated by cleaning and dyeing plants are

merged with the cleaning plants which owned them and are not treated as separate establishments. Independently owned agencies for cleaning plants are included in the classification "Garment pressing, alteration, and repair" (SIC 7271). Establishments known as "tailor shops" or "cleaners" are included in this classification only if they do their own cleaning.

Rug cleaning and repairing plants (SIC 7217)—Plants primarily engaged in rug cleaning or in rug cleaning and repairing. Establishments which do rug repairing only are classified in "Other repair shops, related service, n.e.c." (SIC 7699 part); those which do rug cleaning on location and have no rug cleaning plant are classified in "Miscellaneous personal service" (SIC 7299).

Garment pressing, alteration, and repair (SIC 727)—Establishments primarily engaged in pressing, repairing, altering, and storing clothing, including fur, for individuals. Valet shops and establishments generally known as "tailor shops" are included in this industry, provided they do not operate their own cleaning plants, but custom tailors and fur shops making fur apparel to custom order are classified in retail trade. Establishments known as "cleaners" which do no dry cleaning on the premises but which have their cleaning or cleaning and pressing done for them by others, and independently owned collecting and distributing agencies serving cleaning and dyeing plants or power laundries are included in this classification.

SPECIAL TABULATIONS

Special tabulations of data collected in the 1967 Census of Business may be obtained on computer tape, on punch cards, or in tabular form. The data provided in such special tabulations will be in summary form and will be subject to the same rules prohibiting disclosure of confidential information (including name, address, kind of business, or other data for individual business establishments or companies) as are the regular publications.

Special tabulations are prepared on a cost basis and the request for a cost estimate, as well as exact specifications on the type and format of the data to be provided, should be directed to: Chief, Business Division, Bureau of the Census, Washington, D.C. 20233.

Current Business Reports

The Bureau of the Census publishes the results of its continuing surveys in a series of reports issued weekly, monthly, quarterly, and annually. Listed below are selected reports which comprise a valuable reference library on current business developments.

COUNTY BUSINESS PATTERNS (CBP)

Data on mid-March employment and January-March payrolls taxable under the Federal Insurance Contributions Act are published annually in these reports for the United States, States, counties, and standard metropolitan statistical areas. These statistics are shown for many kinds of business under the following broad industry groups: Agricultural services, forestry, and fisheries; mining; contract construction; manufacturing; public utilities; wholesale trade; retail trade; finance, insurance, and real estate; and services.

RETAIL TRADE REPORTS

Weekly Retail Sales—Estimates of weekly retail sales for the United States for selected major kind-of-business groups, including figures for the comparable weeks in the previous year. Issued each Thursday.

Monthly Department Store Sales for Selected Areas—Monthly dollar sales volume and the percent change in sales compared with the previous month and the same month in the previous year. Cumulative year-to-date comparisons with data for the previous year are also shown. Data are collected in about 200 standard metropolitan statistical areas, cities, and other areas.

Monthly Retail Sales—Estimates of monthly retail sales for the United States by major kind-of-business groups and selected individual kinds of business; separate figures shown, in more limited kind-of-business detail, for firms operating 11 or more retail stores. Summary sales data presented for geographic regions and divisions, and for 15 large States and 20 large standard metropolitan statistical areas. Also included are national estimates of end-of-month accounts receivable balances for retail stores.

Annual Retail Trade Report—Estimates of inventories held by retailers in the United States by major kind-of-business groups and selected individual kinds of business. Separate figures shown in more limited kind-of-business detail for firms operating 11 or more retail stores. Also shown are sales-inventory ratios as well as per capita sales, by kind-of-

business for the United States, by major kind-of-business groups for geographic regions, and summary figures for geographic divisions and for the larger States and standard metropolitan statistical areas.

MONTHLY WHOLESALE TRADE REPORT

This report includes estimated dollar sales, end-of-month inventories, and stock-sales ratios of merchant wholesalers, by kind of business for the current month, with comparisons for previous months. Dollar volume sales estimates are shown by geographic division in total and for durable and non-durable kind-of-business subtotals. Sales and inventory trends (percent changes) are shown by detailed kinds of business at the national level and for selected categories by geographic division. Measures of sampling variability are given. United States data are shown adjusted for seasonal variations and, in the case of sales, also for trading-day differences.

MONTHLY SELECTED SERVICES RECEIPTS

This report provides data on monthly receipts of six major kind-of-business groups of services: Hotels, motels, tourist courts, trailer parks, and camps; personal services; business services; automotive services; miscellaneous repair services; and motion picture, amusement, and recreation services. Comparable data for the previous months and for the same month in the previous year are also shown, in addition to the percent changes. Data are shown both unadjusted and adjusted for seasonal variations and trading day differences.

OTHER CURRENT BUSINESS REPORTS

Canned Food Report—This report is issued as of five dates—January 1, April 1, June 1, July 1, and November 1—to show total stocks of wholesale distributors and canners, including warehouses of retail multiunit organizations, of selected canned food items (vegetables, fruits, juices, fish). In the January 1 report separate data are shown for the No. 10 can size, as well as for warehouse stocks of retail multiunit organizations.

Green Coffee Inventories and Roastings—This quarterly report provides estimates of green coffee inventories held by roasters, importers, and dealers, the quantity of green coffee roasted, and the amount roasted for soluble use, by quarters, for the current and previous three years. Also included are quarterly imports of green coffee during the same period.
